

BodyShield Supplement: Post-Nonhardware Evidence Map

Anonymous Authors

July 8, 2026

1 Artifact Map

The canonical post-nonhardware audit is `reports/POST_NON_HARDWARE_REPO_AUDIT.md`. Hardware blockers are listed in `reports/HARDWARE_BLOCKER.md`. External checkpoint blockers are listed in `reports/EXTERNAL_CHECKPOINT_BLOCKER.md`. Submission-readiness gates are listed in `reports/SUBMISSION_READY_AUDIT.md`.

2 Boundary

This supplement covers analytic/synthetic and bounded simulator artifacts only. Real robot videos, physical modifications, real-video WAM, and real corrective traces are absent.
